Bitterroot Suite by Stephen Katz on sale! \$27

Bitterroot Suite is a tour-de-force solo/looped work for the cello that represents a revolution in the use of single-note strumming, and the integration of looped material. The loops are recorded in real-time and played back via foot pedals connected to electronics (sorry, not included!). Arco lines and solos are then played along with looped "accompaniments". Score merges live part with looped playback parts through cues and clearly notated looping actions. Includes instructions for performers, and looping equipment suggestions. In E Minor / A minor. 15 minute solo

cellocelli.com was created and launched in late 2007 to provide a forum for the advocacy, awareness and development of alternative cello music to all individuals who are dedicated to and participate in the cello industry - artists, students, professionals, teachers, associations, media, concert and festival organizers.
